- Cards
- Menus

FOTOCREASER C33™ Manual Creaser

Light and compact table top unit
Max. creasing width 330 mm / 13"
Creases soft covers, photos, pictures, cards, menus...

Compact creasing machine

Fastbind FotoCreaser C33™ is a manual table-top creasing machine, designed to score photo paper without damaging the printing; thanks to this original design, the crease is precise and protects the quality of your pictures. The FotoCreaser C33 fits naturally in any environment and covers all your short runs and on-demand creasing needs. It's so light and compact that you can put it away in a shelf or drawer when you don't use it!

The FotoCreaser C33's consistent pressure guarantees a sharp regular crease in photographic paper as well as card, copy paper, PVC coated cardboard, and numerous other materials.

Quality and ease of use

Thanks to its unique design, Fastbind FotoCreaser C33™ is very easy to use. A simple thumb-screw along the measurement scale makes it easy to adjust the backstop to the format you're using. A second backstop is also available as option, to allow you to pre-set two creases distances. Positioning your card couldn't be faster and simpler. Regardless of the stock, you lift the handle without effort and obtain a consistent creasing result. The precision creasing bar works with almost any paper and card up to 400 g/m² (or 220 lb index stock); you just turn the reversible blade to go from thicker to thinner materials in seconds.

Versatile applications

Fastbind FotoCreaser C33 is ideal for creasing photo book pictures. It is also a perfect solution for your other creasing needs: soft covers, greeting cards, restaurant menus, advertising calendars, exhibition programs, invitations, brochures, folders...

It's the perfect tool for photographic studios, photo labs and professional photographers who seek the highest quality and protection of their photos. Thanks to its versatility, it also perfectly meets the needs of digital printers, copy shops and on-demand publishers.

The perfect complement for Fastbind FotoMount F32™

Small footprint, premium quality

Fastbind FotoCreaser C33™ is a perfect companion for Fastbind FotoMount F32™. Both machines offer premium quality and are very easy to use. You effortlessly crease your pictures before mounting your photo book.

Another benefit is the very small footprint. The FotoCreaser C33™ can be placed and operated on top of the FotoMount F32™, which means that you save valuable working space in your office or workshop.
