

Hard Cover Groove Press  
**FASTBIND PRESSO™**

**PRESSO™**

Compact design  
Safe and easy to use  
Supports spine length up to 480 mm

## Groove with the best press

The Fastbind Presso™ is a completely new kind of product for creating high-quality grooves in hard cover books. The Presso™ adds a touch of premium quality to any hard cover finishing job. Dramatically improve the appearance of all your hard cover books with Fastbind Presso™.

## Premium grooves in seconds

The Fastbind Presso™ is a thermal press designed to make grooves quickly and easily. After a brief warm up period, the press is ready to go. Simply put your hard cover book into the press and pull the lever. Repeat for the other side, and you are done. Your hard cover books get symmetrical, deep, smooth grooves that hold tight against the book block...every time.

With Presso™, you can add grooves to hard cover books up to 45 mm thick. No adjustments are needed going from one thickness to another. You can add grooves regardless of hinge size or cover board thickness. The pressing distance is easily adjustable with exchangeable spacer plates.

The hot plate inside Presso™ is situated deep inside the machine, keeping it safely away from the operator. And with its compact design, the Presso™ fits easily onto most any table top

## Complete finishing solutions

Fastbind offers a wide range of products to meet all your on-demand finishing needs. Fastbind Casemakers form a perfect companion to the Fastbind Presso™ for making custom hard covers. You can also select from a range of affordable pre-made hard covers, and much more.

Product information as of June 2010 and is subject to change without notice.

Symmetrical, deep and smooth groove.

Easy to use.

## Compatible with Fastbind Casemakers™ and Fastbind Designer software

Modern digital printing means you can personalize both book cover and content with the same variable cost and production speed as standard publishing. The demand for these kinds of books is growing fast. Personalized books carry an emotional value not found in standardized publications.

With Fastbind Designer – Dg Foto Art software, design hard and soft covers of your choice. You produce the printed cover, in whatever format, on Fastbind Casemakers.

Once the cover is made, you can finish the book using a Fastbind Binding machine. Fastbind provides all the necessary materials and supplies to produce hard covers for the print-on-demand environment.
